Art Unit: 1315

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-13, drawn to an article, classified in Class 428, subclass 432.

Group II. Claims 14-31, drawn to a method, classified in Class 427, subclass 585.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (M.P.E.P. § 806.05(f)). In the instant case, the claimed product can be made by a materially different process, such as pyrolysis laser ablation.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

5. A telephone call was made to Mr. Geoffrey Myers on 06-20-96 to request an oral election to the above restriction requirement, but did not result in an election being made.
